Sales staff is trained to assist existing and prospective customers in identifying HAC-compatible handsets and devices. Existing or prospective customers can typically find whether a handset or device is HAC-compliant by either checking the packaging

containing the handset/device, or by consulting the packaging insert or operations manual. For more information on HAC, existing and prospective customers are directed to public websites dedicated to HAC education.

### Methodology for Functionality Levels

The levels of functionality are: (1) "Good" which depicts devices with basic technology on entry level data speeds; (2) "Better" which depicts devices with advanced technology and or with advanced functionality; and (2) "Best" which depicts devices with new technology and or with new functionality that operate on faster data speeds.

### Report Remarks

Due to ULS system errors, Chester's attempts to include the air interface/frequency band "2.4 GHz Wi-Fi" for applicable handsets appear in this report as "2.4 MHz Wi-Fi."
